VMV HYPOALLERGENICS PRODUCTS – VMV FUNDED STUDIES

As of 3/10/2007, 31 products of VMV Hypoallergenic are included in CARD (Cosmetic Allergen Replacement Database), a service available exclusively to members of the American Contact Dermatitis Society(ACDS).

In February, 2007, the AAD announced the ACDS / CARD winners in the 10th Annual Gold Triangle Awards:

The ACDS “is being honored for its web site and innovative Contact Allergen Replacement Database (CARD), a novel database expertly Crafted by James Yiannias, MD. CARD provides physicians and their patients a valuable tool to facilitate education and management of allergic contact dermatitis. *With over 85,000 hits in 2004, physicians have commented that CARD “has radically changed patient counseling” further stating that “CARD is revolutionary. Patients are equally pleased because they need not navigate complex antigen names in order to choose products safe to use”.*
